

Problem with Replica Set

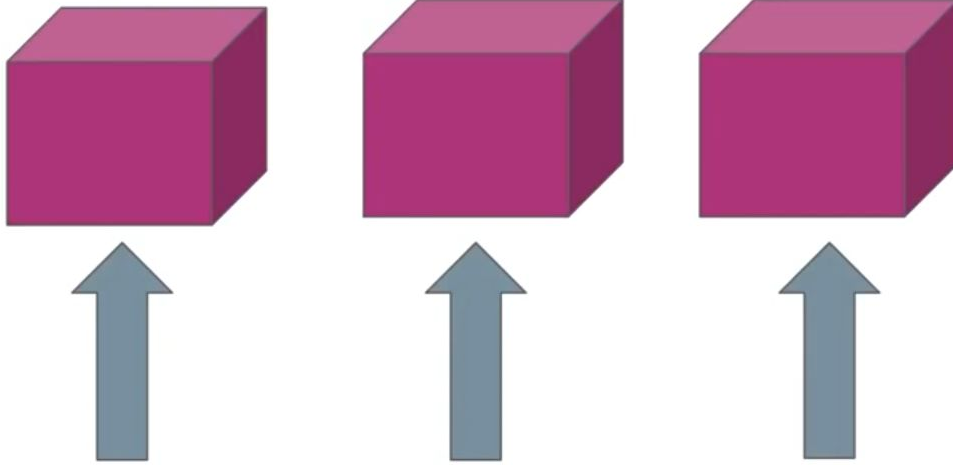

Version 1

Problem with Replica Set

Version 2

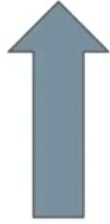

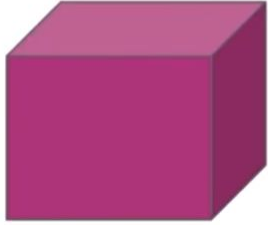

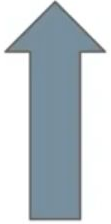

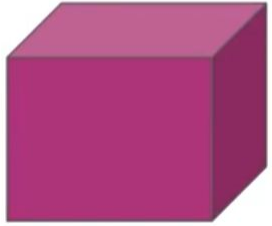

**Application Will Not
Accessible to User**

Deployment

Rolling Update

Version 2

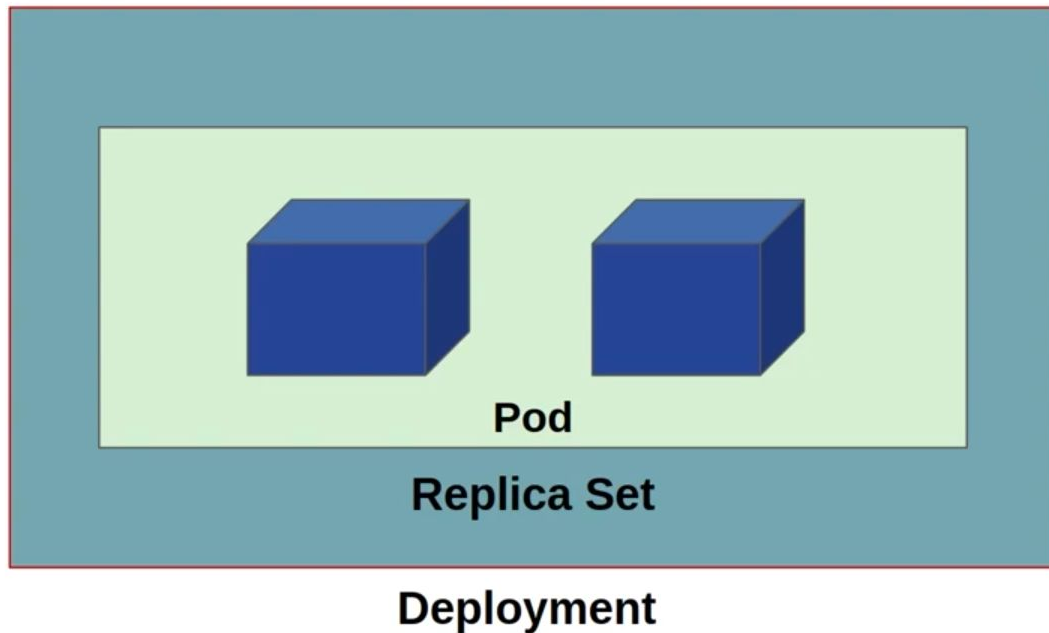

Accessible to User

Deployment

- Rolling update
- Rollback

Questions ?

1. Create a Deployment name my-deploy with image nginx.
2. Scale my-deploy to 3 replicas.
3. Replace the image in my-deploy nginx to nginx:alpine.
4. Scale down to 2 replicas.
5. Rollback to previous version of my-deploy.
6. Delete Deployment, Replica Set and pod created by my-deploy.
